

Multipurpose Centre

EcoSUN Green Village

**for Ekuphumpleni a settlement in Nlambe Municipality
Eastern Cap of South Africa**

More than 100 new RDP houses were built in 2016 /17.
The central green area is favoured for the Community Centre.
Up to 7 houses foreseen for EcoSUN piloting, to be built
around the Community Centre.

Because of the position of the EcoSUN Green Village site
close to the main road visitors easily approach. The demon-
stration of the EcoSUN technology components, an Internet
Café, and a gym established in the Community Centre will
attract people of the township but also guests and offer
chances for income generation and re-financing of mainte-
nance costs. Jobs could be created.
